QUALITY, SERVICE, EXPERIENCE TO COMPETITIVELY MEET YOUR NEEDS SINCE 1972

McLAUGHLIN

Metal Sales Company

MANUFACTURERS REPRESENTATIVES

"WE SPECIALIZE IN THE INTRODUCTION OF GOOD CUSTOMERS TO GOOD SUPPLIERS"
SINCE 1971

COLD DRAWN WIRE AND SHAPED WIRE

Bright low carbon, bright high carbon, annealed, galvanized

Leggett & Platt is a leading U.S. producer of drawn steel wire. We have unequaled expertise and experience in every aspect of wire production to include shaped and specialty wire products. Our wire mills produce virtually all the wire consumed by our other domestic businesses and supply a diverse group of external customers. Significantly, most of the steel rod used to produce our wire is manufactured in our own rod mill. Additionally, we manufacture a variety of formed or fabricated, wire-based products used across a broad range of markets. Leggett & Platt is a fully vertically integrated manufacturer able to take scrap steel and, through a number of steps and facilities, convert it into a finished product.

PIPE AND MECHANICAL GALVANIZED TUBING

CW & ERW pipe, sprinkler pipe, galvanized tubing

Wheatland Tube manufactures tubular steel solutions for commercial and industrial applications. Wheatland is the most comprehensive source for manufactured steel tubular products in North America. Understanding our customer's needs, applications, markets, business and distribution channels, in addition to more than 130 years of manufacturing history, have proven "Our Strength to Deliver". This has enabled our customers to trust Wheatland Tube as their resource for new and existing steel pipe and galvanized mechanical tubing products.

Parthenon Metal Works

PLAIN FINISH STEEL TUBING

Round, square, rectangle, oval, tri-oval

Parthenon Metal Works objectives are to provide exceptional quality products and customer service by striving to exceed our customer's expectations. Our quality assurance methods and continuous process improvement process position us as the industries' leading producer of high quality, low cost welded steel tubing. We strive to provide cost effective solutions to complex requirements, giving our customers the edge that they need to succeed in today's competitive and rapidly changing marketplace.

FLAT ROLLED PRODUCTS

Cold-rolled, galvanized, and hot-rolled pickled and oiled substrates

Custom Steel Processing is recognized as an industry leader for quick order turnaround and JIT delivery of carbon steel flat-rolled products processed and packaged to your exact specifications. CSP offers comprehensive, state-of-the-art cut-to-length, slitting, custom blanking, and shearing for cold-rolled, galvanized, and hot-rolled pickled and oiled substrate. Our unparalleled service, competitive prices, and total overall value are why our loyal customers won't go anywhere else.

VENDOR MANAGED INVENTORY (VMI)

Component parts, castings, forgings, stampings CNC parts, fasteners, wire forms, fabricated metal, turnkey assemblies, hardware, plastic parts

Leverage Purchase Partners expertise to develop supply solutions for hardware and component part purchases that provide improved purchase prices, reduced total realized costs, and significantly enhanced service levels. Offering industry leading technology that delivers the most robust vendor managed inventory solutions in the marketplace!
